Maintenance

During the last year we have undertaken a lot of necessary remedial work to ensure that the club complies with Health and Safety Regulations. Works completed include;

- Electrical remedial work as a result of the statutory 5 yearly Electrical Inspection and Test.
- Main and secondary electrical distribution boards replaced.
- New electrical sockets behind the bar.
- Statutory Fire Risk assessment undertaken resulting in the replacement of lighting and emergency lighting with additional ELs on escape routes to ensure compliance.
- Asbestos Management survey undertaken in accordance with the Control of Asbestos Regulations 2012.
- Gas safety Certificate renewed.
- Court heater servicing.
- New on/off court heater switches placed outside of courts.
- New hob in the kitchen.
- New shower mixer taps.
- New fire door.

- New boiler.
- New outdoor lighting.

All these works were necessary to ensure that we both comply with legislation and ensure the safety of our members and guests.

In addition to the above we have completed refurbishment of all four courts.

During the next year the committee intends to continue to make improvements to the club. We would welcome any suggestions from members as we go about prioritising this work.
